

Fresco 3000

Cooling Capacity 950 W / 3250 BTU

The Fresco 3000 is a DC powered air-conditioning system which works while the vehicle's engine is turned off allowing drivers to rest in comfort wherever they are, day or night.

The Fresco 3000 reduces the inside cabin temperatures as well as lowering the humidity level.

The unit consists of a condenser which is mounted on the external rear wall of the cabin and evaporator which is installed on the interior cabin wall.

The split design offers maximum flexibility in positioning the separate components.

The lightweight and low profile design means that the unit is suitable for most applications, without compromising fuel load or chassis space.

Features and Benefits

- 12 V & 24 DC
- Cooling capacity 950 W / 3250 BTU/hr max A/C
- Single Danfoss BD350 compressor
- Lightweight only 23 kg (condenser 18kg, evaporator 5kg)
- Digital controller panel with programmable timer
- Multi function remote control
- 6 speed fan
- 4 adjustable and closable vents
- Low voltage cut out
- Low maintenance
- Very low noise
- Low profile- slim line design
- Minimal intrusion on rear wall during Installation (i.e. single small hole cut out)
- 2 year Australia wide warranty.

Technical Specifications- Fresco 3000
