

COOLABAH

Power Your Mobile Food Service With

Zero Fuel

Zero Emissions

Zero Fumes

Zero Noise

Australian-Made Lithium Battery Systems for Food Service Vehicles

www.coolabahdca.com

Break Free from Generators

Is your mobile food business held back by traditional power systems? Diesel & petrol generators once revolutionised mobile food service, but today they're holding businesses back with:

- **High fuel costs** eating into your profits
- **Regular maintenance** costing you time and money
- **Noise pollution** limiting your operating locations
- **Toxic fumes** compromising food service quality
- **Event restrictions** blocking prime business opportunities

The Future of Mobile Power is Here

Coolabah's lithium iron phosphate battery technology transforms your mobile business, eliminates the headaches of power supply and **sets you apart from the competition!**

All-day Reliable Power

Choose from **20kWh to 40kWh systems** tailored to your needs. Charge overnight using standard 240v or 3-phase power, with optional solar panel integration.

Optional Extras

The battery packs can be equipped with **DC-DC charging & solar charging inputs** for those seeking additional forms of charging outside 240v mains, and higher Amp input plugs can be optioned.

Performance You Can Trust

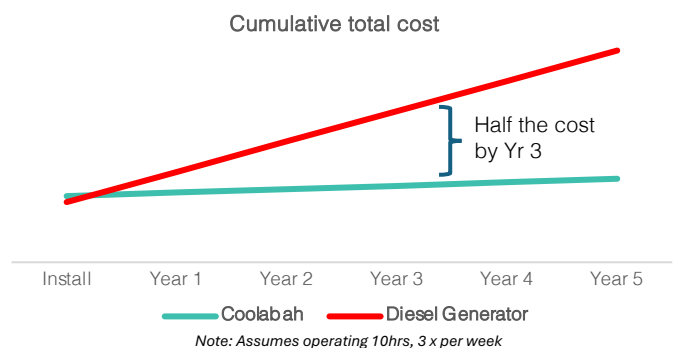

Enjoy **10+ hours of continuous operation** per charge. Silent, fume-free power lets you operate anywhere – including indoor venues and restricted locations.

Proven Cost Savings

Save upwards of **\$7,500 annually** on operating costs. Eliminate fuel expenses and costly maintenance while accessing more venues.

Immediate Total Cost Savings Vs Diesel

Real Results in Real Businesses

Case Study: Big Pink Ice Cream Van Operation

A current business running Coolabah systems using a 40kwh Wattle Pack powers all 240v appliances in an ice cream van operating 6 days per week for 10 hrs per day. The results speak for themselves:

10 Hrs
Operating Time

\$7,500+
Annual Savings

ZERO
Noise, Emissions &
Maintenance

10 Hr
Charge using 240v
15A power socket

"Coolabah is a game-changer for us in this business, it's efficient, it's soundless, there's no fumes and we don't have to service them."
- Aaron, Big Pink Soft Serve

Australian Innovation, National Support

Coolabah is proudly Australian-owned and made. Our journey began with Australia's first lithium battery powered truck sleeper cab air-conditioning system, now installed in over 4,500 trucks nationwide.

The Coolabah team specialise in innovative solutions for businesses where others see obstacles. We focus on quality products, expert workmanship, and practical solutions that work in the real world. We couple this with unparalleled support.

National Agent Install & Service Network

With over 30 qualified installers and repairers across Australia, we provide rapid local installation and support wherever your business takes you. Our nationwide network ensures you're never far from expert assistance.
